Local student shares her experience with Lupus

May is Lupus Awareness Month. Goodridge 8th grader LillyAnn Busse was diagnosed with Lupus when she was eight years old. She wrote an essay for school about her experience. That essay is shared below.

My Lupus Experience
Written by LillyAnn Busse
Today I will be sharing about my Lupus experience and how it has made an impact on my life and my family's life. Lupus is a long-term disease that can

cause inflammation and pain in any part of your body. It is an autoimmune disease which means that your immune system - the body system that usually fights infections - attacks your healthy tissue instead.

It all started on a regular day. I woke up and did my regular morning routine before school. I remember having to use the bathroom so badly to the point I could cry. Little did I know what that bathroom trip would hold for me. Next thing I knew, I was running to my mom for help because I was only eight, I had no clue what was going on. The next day, I went to the hospital to get a heart scan, ultrasound, and blood work done so we could see if something was going on or if it was normal.

The next day, we got a call from a doctor in Sioux Falls, SD, stating that I should go there and get a biopsy done. In my case, I would have my biopsy done on my kidneys. About a week after the phone call, we were off to Sioux Falls so we could figure out what was going on. I remember getting there and going shopping, then we rented a hotel room.

The next day was the day for the biopsy. I got to the hospital, and they explained everything and how the operation would go. When the results came back, they declared I had Lupus. I knew from there

on out my life would be forever changed.

Lupus has changed my life in every form imaginable. It can be a very scary experience that I wish upon no one. I am now on a restricted diet. I can't have that much salt intake, or I have what they call a flare up. A flare up can come in many ways. You could be tired, or you could be very excited and nervous or you could feel sick. When I have a flare up, I usually get really hot and start overheating. Lupus is not a curable disease. It is also lifelong.

I was able to be a part of the "Make-A-Wish" Foundation and they were the sweetest, most loving people I have ever met. My original wish was to be able to go on a vacation to Hawaii and see the Pearl Harbor Museum. But sadly, they weren't able to make that happen because of Covid. So instead of going on a trip I wished to get a dog.

I remember getting back from the hospital and everyone at school gave me weird looks, and I used to get bullied for gaining weight. After a while, everything went back to almost normal. I am still taking medicine for Lupus, and hopefully within the next year, I will be off of it and back to not taking any meds at all. And that will be a wrap to my essay. I hope you enjoy reading it as much as I did writing it.

Grygla School announces Phase 1 of cuts for upcoming academic year

Submitted by Derek Gieseke, Grygla School Superintendent/Principal

Dear Grygla Community Members,

I hope this letter finds you well. As we approach the end of the school year, I wanted to take a moment to share some important updates regarding our upcoming plans for the school district programs. While change can sometimes be challenging, I firmly believe that it also presents us with opportunities for growth and innovation.

In response to recent budget adjustments, we have carefully evaluated our current programs and resources to ensure that we are utilizing them in the most effective and efficient manner possible. We have been working hard this year to find ways to decrease spending, but unfortunately it hasn't been enough. As a result, we have made the difficult decision to implement some program cuts for the upcoming academic year. These cuts will be announced in two phases. Making these cuts now allows sustainability while we work with you on hopefully passing a referendum this fall.

While I understand that this news may cause concern for some members of our community, I want to assure you that these changes are being made with the best interests of our students in mind. By streamlining our programs, we will be able to focus our resources on initiatives that have proven to be most impactful in supporting student success.

Additionally, I am confident that these changes will provide us with an opportunity to foster a culture of creativity and collaboration within our schools. We are committed to working closely with our dedicated staff, students, and families to identify innovative solutions and alternative approaches to ensure that all students continue to receive a high-quality education.

Below, you will find the first phase of cuts which will be implemented in the 2024-25 school year:

- Track
- Baseball
- School Board Salary
- Robotics

I truly believe that challenges are simply opportunities in disguise, and I am excited about the possibilities that lie ahead for our school community. Together, we have the power to embrace change, adapt to new circumstances, and emerge stronger than ever before. My hope is to be able to reimplement some of these programs when finances allow us to do so.

As always, I am grateful for your continued support and partnership as we navigate these changes together. If you have any questions or concerns, please do not hesitate to reach out to me directly at the school (218-294-6155).

Thank you for your unwavering dedication to our students and our schools.

Warm regards,
Derek Gieseke
Superintendent/ K-12 Principal, Grygla Public School
