Win-E-Mac celebrates Homecoming:
Kelsey Knutson and Aaryk Neubert crowned

The 2015 Win-E-Mac Homecoming Court: (L-R) Andrey Erofeef, Jordan Olson, Kyle Walters Queen Kelsey Knutson, King Aaryk Neubert, Jessica Kasprzak, Kinlee Faldet, and Rachel Morberg.

Cute as can be, the 2015 Homecoming Court included 2nd graders Karlie Schow and Dawsen Olson.

Morgan Bauer helps out her sister Nevaeh with a pumpkin last Tuesday during the ECFE Pumpkin Patch Trip to the Voxland farm north of McIntosh.

MHAC will host a Harvest Hay Ride this Saturday in McIntosh

There is no better way to spend an autumn Saturday than outside enjoying the brisk fall weather and no better way to do that than on an old fashioned hay ride.

Bring the family and enjoy an old fashioned hay ride around the Community of McIntosh on Saturday, October 10, 2015 from 3:00 pm to 5:00 pm at Roholt Park.

There will be many activities available at the park as well. You can play some fun, outside games, or decorate a mini pumpkin or gourd.

After all the fun enjoy a cup of hot chocolate, have a hot dog off the grill or make a s'more..

Come out and spend the afternoon with your family and neighbors and the McIntosh Heritage and Arts Center members.

Proceeds from this event will benefit the MHAC general fund and building restoration projects. All activities are provided for a free-will donation.

In case of bad weather, the event will relocate to the McIntosh Community Center. No matter the weather, the hayride will happen, so dress for the weather!

There were lots of pumpkins to choose from at the Voxland Pumpkin Patch where last Tuesday, the Win-E-Mac ECFE group went to play and pick a pumpkin to take home!

Peyton Roed had a lot of fun picking out a pumpkin to take home from the Pumpkin Patch last Tuesday with the help of her mom, Mackenzie and her grandma, Danette Strom.

More Pumpkin Patch Trip pictures next week in the McIntosh Times!

Greater MN Job Training Incentive program grants available

Representative Deb Kiel (R-Crookston) authored legislation that created new job training grants for Greater Minnesota and is encouraging businesses to apply for those grants through the Job Training Incentive Program, which is handled by the Minnesota Department of Employment and Economic Development (DEED).

New or expanding businesses in Greater Minnesota can apply for grants of up to \$100,000 to train workers in new jobs.

"I authored this legislation for Greater Minnesota businesses and for the workers in our community looking for better paying job opportunities," Kiel said. "I was proud to sponsor this bipartisan legislation last session and am hopeful that local businesses will take advantage of this wonderful opportunity. Northwest Minnesota is a great place to live and work!"

Applications will be accepted beginning October 15th, and awarded on a first-come-first-serve basis to eligible businesses. \$900,000 in total funding is available through June 30, 2016, with an additional \$900,000 available starting next July.

According to DEED, eligible businesses must be located outside the seven-county Metro Area, and funding may be used "to pay direct training costs, including wages for on-the-job training."

Businesses must add at least three new permanent jobs, and pay must be equal to at least the average weekly wage for the county in which the jobs are located.

DEED will be hosting an informational session in Detroit Lakes, MN on Wednesday October 14th from 11AM to noon at the City Council Chambers (1025 Roosevelt Ave).

More information can be found on the DEED website at www.mn.gov/deed.

Questions about the program can also be directed to jodie.greising@state.mn.us.

Winger News

by Linda Pulskamp

Greetings from Winger and the Union Lake areas and welcome to October. Was a windy but a very nice weekend we had but we woke up to a rather chilly and frosty Tuesday morning, although I did not see any frost damage to any of my flowers that were out.

Am seeing more and more flocks of geese that are heading south, seems like they just came but apparently they know that the time has come to migrate again.

Pumpkins and Halloween are showing up more and more places and I must say that I am seeing many pumpkins of various sizes and kinds too. Make for some attractive Halloween decorations.

As I came into town last Thursday night from work, I saw all the vehicles that were parked in the north end of town and down main street in front of the community center, looked to be a good crowd of people that took in the estate sale at the Espeseth home, and many more took in the sale during the weekend.

On to the news and once again it is not a lot but as they say it is better than nothing.

Judy Gieseke was a visitor at the Fern and Milton Carlson home on Thursday the 24th.

Helmer and Verlys Homme visited with Judy and Roy Raben at the Raben home at Union Lake last Tuesday.

Lucy Brtek was among the many family and friends that attended the 95th birthday party for Wilma Wang last Saturday afternoon at the Cornerstone in Fosston. Was a very enjoyable afternoon for Wilma and quite a milestone for her. HAPPY 95th Wilma and hope you can enjoy many more.

Paul and Donna Carlson were Saturday morning visitors at the Fern and Milton Carlson home. Later on Saturday Fern and Milton were guests at the Mike, Kari, Terry and Oliviayah Keller home at Bejou. They brought home fresh picked apples for the Keller's apple tree.

Saturday afternoon Kelly Johnson and granddaughter Lily visited at the Pulskamp home. Stopping by while on a ride on their side by side wheeler for a short visit were Danny, Angie and Tegan Brtek.

Truman and Darlene Johnson returned to their home in Dilworth after spending some time at the Boyd and Sylvia Bratager home. While here

Truman helped with the harvest.

Monday evening the 28th Paul and Donna Carlson visited with Fern and Milton Carlson and brought them home made vegetable soup for supper.

Lucy Brtek visited at the Danny and Angie Brtek home on Saturday night and helped to observe grandson Justis's 14th birthday.

Brian and Marilyn Bratager of Preston were last week end house guests at the Boyd and Sylvia Bratager home.

Mark and Betty Syverson were visitors with Helmer and Verlys Homme at the Pioneer Home last Sunday afternoon.

Judy Gieseke was a visitor at the Fern and Milton Carlson home on Tuesday the 29th. She came bearing fresh garden produce for Fern and Milton.

MARK YOUR CALENDARS! The Calvary Church WELCA will be holding their fall auction sale on the 28th at 7:30PM. Will be lots of crafts, quilts, baked and canned goods along with pie and coffee after the sale.

Until next week may you have a good one.

From Bun Manor:

Former Winger Calvary Pastor Nathan Baker from Trinity called Bun the other day and told him that a 23 year old man from his congregation had broke his neck and was having a hard time adjusting to his situation. He asked Bun if he would reach out to him and tell him that life can go on when it throws you a curve ball.

He told him that he would try.

Tuesday afternoon Bun headed over to the Club in Mac to have lunch with Laura Wang. He hadn't seen her for awhile so it was fun to catch up on things.

He went over to Krissy's afterwards to have his hair affair with Ashley. She is getting excited on her upcoming wedding to Aaron Lucken. She told him that as long as Aaron shows up all the wedding plans will work out fine.

Bun headed over to McIntosh Senior Living place to see how Darrell Westcott was doing. He is doing okay but he isn't the same Darrell that Bun knew when he was growing up. On his way out he noticed Charles and Wanda out in the flower garden by the front entrance. Wanda was supervising

while Charles was doing all the digging.

Adella Thompson took faithful care of the garden for a number of years but her family suggested she should take it a little easier.

Thursday evening while Bun and Bob were watching the Twins, Bob spotted a bull moose out in the front yard by the lake. The moose went into the lake and swam across it to the other side. Bun has seen deer, skunks, a horse, ducks, eagles, squirrels, raccoons and dogs before out front but never a moose. He doubts that will ever happen again in his life time.

Brother Andy came home for a couple of days to visit. Him and Bun headed to the gaming tables a couple of times during his stay

IRS Imposters Continue to Call

Tax season may be over, but criminals posing as Internal Revenue Service ("IRS") agents continue to call Minnesotans and attempt to intimidate them into paying money. These criminals use a variety of ploys to lure victims, including using fake names, false IRS badge numbers, and even reciting the victim's mailing address or the last four digits of their Social Security Number. The callers may threaten arrest, jail time, driver's license and passport revocation, and other legal action, unless the victim pays for purported back taxes or fines supposedly owed to the IRS.

In many cases, it can be difficult to detect these fraudsters, who often call from outside the United States. They use "spoofing" technology to hide the origin of their calls. Spoofing is used by these scammers to make a Washington D.C. telephone number appear on a resident's caller ID, thereby masking their identity and evade law enforcement.

The Treasury Inspector General for Tax Administration ("TIGTA") notes that these scammers make more than 10,000 calls per week. In the past two years, victims of this scam have reportedly lost \$15 million.

If you receive a call that appears to come from the IRS, remember that the IRS does NOT: Ask for credit or debit numbers over the phone; Require you to use one specific method to pay back taxes; nor Threaten to bring in local police or other law-enforcement

15 fun facts about autumn

The cool, crisp days of autumn have arrived. As fall foliage creates a colorful display and kids frolic in leaf piles on the lawn, you may want to pay some mind to a few lesser known facts about this beloved time of year.

Autumn may call to mind Halloween and the return of school, but there are other factors that make this season unique.

1. The first day of autumn is known as the autumnal equinox. On this day, the number of hours of daylight and darkness are equal. This is because the sun is aligned with the center of the Earth between the north and south of the planet. The other equinox occurs in the spring, which arrives in the third week of March in the Northern hemisphere.

2. In Greek mythology, autumn was a time when Persephone, the daughter of Demeter, was abducted by Hades, the god-king of the underworld. During this time, Demeter, the goddess of the harvest, was distraught and the ground grew sparse and cold. When Persephone returned in the springtime, plants and life bloomed anew because of Demeter's happiness.

3. Those who live closest to the equator, which is the center of the planet, never experience the season of autumn. Around the equator, the temperature remains consistently warm.

4. Yellow, orange and variations thereof always reside in the pigmentation of tree leaves, but they are just overpowered by the abundance of green from the chlorophyll in the leaves. Come autumn, however, when the sun weakens and days grow shorter, the amount of chlorophyll in leaves diminishes, allowing the other pigments in the leaves to show through.

5. Red and purple leaves are actually caused by the presence of sugars from sap that is trapped inside of the leaves.

6. Fall is a peak migration time for many species of birds. During autumn, birds will fly to other areas as they seek more hospitable climates. The Arctic tern journeys about 11,000 miles each way for its annual migration. That is like going all the way across the United States about three and a half times

7. Contrary to popular belief, squirrels who have spent the entire autumn collecting acorns and other foods do not hibernate for the winter. Rather, they spend the majority of

their time in nests they built to shelter them from harsh weather. When squirrels do come out in winter, they are usually tunneling under the snow to find the food they buried during the fall.

8. Several cultures have ancient traditions that coincide with autumn. For example, the Chinese celebrate the Moon Festival to give thanks for a successful summer harvest.

9. Halloween is a large part of autumn. The concept of wearing masks and costumes hails from ancient Celtic tradition. The Celts believed ghosts roamed on Halloween, and people wore disguises to hide from the spirits.

10. You're bound to see pumpkins as part of autumn decor. The pumpkin was first named by the Greeks. They called this edible orange item "pepon," which means "large melon."

11. Evergreen trees will not lose their leaves like deciduous trees. Their leaves, also called needles, are covered with a thick wax. This wax protects the inner components of the needles, preventing them from freezing.

12. Autumn also signals another colorful spectacle apart from the tree leaves.

The aurora borealis, also known as the Northern Lights, tends to be visible this time of year. This is because geomagnetic storms are about twice as likely to occur during the fall thanks to cool evening weather.

13. A study in the journal Perception noted that men think women are more attractive in the cooler season. One theory is that men's testosterone levels rise during the fall. Another theory is the "contrast effect." During the summer, men are frequently exposed to scantily clad women—but not so much in the autumn, which shifts "attractiveness criteria" in women's favor in the fall.

14. The word "harvest" comes from the Old Norse word haust, which means "to gather or pluck." As people moved to the cities, "harvest" fell out of use and city dwellers began to use "fall of the leaf," which was shortened to "fall."

15. Most meteorologists define autumn as lasting through September, October, and November in the Northern Hemisphere. In the Southern Hemisphere, autumn lasts through March, April, and May. Specifically in New Zealand and Australia, autumn officially begins on March 1 and ends on May 31

30 years ago...1985: Jim Votava, rural McIntosh mail carrier is shown accepting his safe driving pin from McIntosh Postmaster, Marlene Habadank.

20 years ago...1995: Hustlings managers for the 1995 Patriot Football team, (L-R) Carl Hedlund and Bobby Strom, were also honored at the Parent's Night festivities following the Homecoming game on October 6th.

Tips on Winter Feeding

Hay loss and feed waste are inevitable components of most livestock production systems.

Waste, however, is a fuzzy term when considering the movement of nutrients on a farm. Many livestock owners may not consider hay wasted during feeding as true waste, but rather, a simple transfer of nutrients to another area. When a producer routinely feeds rolled-out bales, an economist may consider some of the hay as "wasted", while a soil scientist may see it as simple movement of nutrients from one place to another. So waste is a relative term.

Hay waste studies at NDSU, the University of Minnesota and Michigan State University discovered that cows fed processed (then windrowed) bales consumed more hay and had a 16-pound weight gain advantage during a 60-day feeding period compared with cows fed rolled-out bales.

In addition, the amount of wasted hay was slightly greater for rolled-out bales than processed bales. However, an economic analysis showed the cost of feeding was greater when using a bale processor compared with rolling out bales for feeding.

This is not to say bale processors or TMR mixers are not a wise investment. Their value is often very evident when it comes to feeding a variety of feeds with vastly different forage quality. For example, if you have CRP hay, beet pulp (or corn silage) and high-quality second cutting alfalfa, the mixer is the clear tool to blend and feed forages in an efficient manner. Feeding each separately, in an efficient manner, is nearly impossible.

Feeding bales in a hay ring resulted in less waste compared with rolling bales out on the ground, according to the research. In addition, feeding processed hay in a bunk resulted in less waste than feeding processed hay on the ground.

In all cases, the hay intake was similar, about 26 pounds of hay on a dry-matter basis. The average waste for either of the ground feeding methods was about 18 percent, whereas the average waste from feeding in some type of structure was about 5 percent.

Tapered-cone hay rings also have shown promise when compared with other types of hay feeders.

Based on the research, cows eating from a tapered-cone ring wasted fewer pounds of hay but had similar hay intake compared with those eating from traditional hay rings, hay trailers or hay cradles. Authors of one report recommend that bales fed through a tapered-cone hay ring must be wrapped tightly and twine must not be removed to realize the waste-saving benefit from this type of feeder. But, the cost and hassle of dealing with the twine after feeding needs to be considered as well.

Net wrap should be removed before feeding forages because cattle may eat it. A study at NDSU conducted on several hay bale-binding materials found that the three types of net wrapping and the biodegradable twine had not disappeared 14 days after cattle ate hay with those wrappings. However, more than 70 percent of the sisal twine they evaluated did disappear during that 14-day period.

"Because none of the plastic products disappeared during

our study interval, the potential exists for these products to build up in the rumen through time and possibly lead to associated complications," says NDSU Extension Service beef cattle specialist Carl Dahlen, one of the researchers. "Whether complications occur as a result of net wrap consumed likely is based on the volume of the product consumed and the ability of the plastic particles to move through the digestive tract."

For example, a recent case submitted to the NDSU Veterinary Diagnostic Laboratory was diagnosed as acute bloat associated with excessive net wrap ingestion.

In a case from South Dakota, a month-old calf was found with a large net wrap obstruction. The calf was seen chewing on it, then later regurgitating milk after nursing. The calf was taken to Iowa State University for an exam with a scope revealed the obstruction in the calf's esophagus was a section of net wrap and food particles.

Removing net wrap can be time-consuming, but the cost of removal is easily justified considering the potential cost of losing an animal by ingesting twine -- not to mention the hassle and additional labor in dealing with plastic twine during manure removal.

The various methods of feeding hay can be very simple or more complex and capital intensive. What works best on your operation will depend on herd size, variety of feeds and your individual needs.

For more information, contact me at 800-450-2465 or at stordahl@umn.edu. This information was provided by NDSU Extension Service.

Win-E-Mac
Homecoming Highlights

Legal Notice

NOTICE OF SPECIAL ELECTION
INDEPENDENT SCHOOL
DISTRICT NO. 2609
(WIN-E-MAC)
STATE OF MINNESOTA

NOTICE IS HEREBY GIVEN that a special election has been called and will be held in and for Independent School District No. 2609 (Win-E-Mac), State of Minnesota, on Tuesday, November 3, 2015, for the purpose of voting on the following questions:

SCHOOL DISTRICT QUESTION 1
RENEWAL OF EXPIRING
REFERENDUM REVENUE
AUTHORIZATION

The board of Independent School District No. 2609 (Win-E-Mac) has proposed to renew the school district's existing referendum revenue authorization of \$678.80 per pupil which is scheduled to expire after taxes payable in 2016. The proposed referendum revenue authorization would increase each year by the rate of inflation and be applicable for ten years, beginning with taxes payable in 2017, unless otherwise revoked or reduced as provided by law.

- Yes Shall the increase in the revenue proposed by the board of Independent School District No. 2609 be approved?
- No

BY VOTING "YES" ON THIS
BALLOT QUESTION, YOU
ARE VOTING TO EXTEND
AN EXISTING PROPERTY
TAX REFERENDUM THAT IS
SCHEDULED TO EXPIRE.

School District Question 1 Operating Referendum Renewal					School District Question 2 Additional Operating Referendum	
Estimated Market Value	Pay 2016 Expiring Authority	Pay 2017 New Authority	Net Change	Pay 2017 New Authority	Pay 2017 Total Both Questions	
\$50,000	(\$46.79)	\$46.57	(\$0.22)	\$6.84	\$6.62	
\$75,000	(70.18)	69.86	(0.32)	10.26	9.94	
\$100,000	(93.57)	93.14	(0.43)	13.68	13.25	
\$125,000	(116.96)	116.43	(0.53)	17.10	16.57	
\$150,000	(140.36)	139.71	(0.65)	20.52	19.87	
\$175,000	(163.75)	163.00	(0.75)	23.94	23.19	
\$200,000	(187.14)	186.28	(0.86)	27.36	26.50	
\$225,000	(210.53)	209.57	(0.96)	30.78	29.82	
\$250,000	(233.93)	232.85	(1.08)	34.20	33.12

\$300,000	(280.71)	279.42	(1.29)	41.04	39.75	
\$350,000	(327.50)	325.99	(1.51)	47.88	46.37	
\$400,000	(374.28)	372.56	(1.72)	54.72	53.00	
\$450,000	(421.07)	419.13	(1.94)	61.56	59.62	
\$500,000	(467.85)	465.70	(2.15)	68.40	66.25	

The combined polling place for this election and the precincts served by that polling place will be as follows:

COMBINED POLLING PLACE: Win-E-Mac School
23130 345th Street S.E.
Erskine, MN 56535

This combined polling place serves all territory located in Independent School District No. 2609; Polk and Red Lake counties, Minnesota.

Any eligible voter residing in the school district may vote at said election at the combined polling place designated above. The polls for said election will be opened at 4:00 o'clock p.m. and will close at 8:00 o'clock p.m., on the date of said election.

A voter must be registered to vote to be eligible to vote in this election. An unregistered individual may register to vote at the combined polling place on election day.

Dated: July 21, 2015.

BY ORDER OF THE SCHOOL BOARD

SCHOOL DISTRICT QUESTION 2
APPROVAL OF ADDITIONAL
SCHOOL DISTRICT
REFERENDUM REVENUE
AUTHORIZATION

The board of Independent School District No. 2609 (Win-E-Mac) has also proposed to increase its general education revenue by an additional \$81.20 per pupil. The proposed new referendum revenue authorization would increase each year by the rate of inflation and be applicable for ten years, beginning with taxes payable in 2017, unless otherwise revoked or reduced as provided by law.

- Yes If School District Question 1 is approved, shall the increase in the revenue proposed by the board of Independent School District No. 2609 also be approved?
- No

BY VOTING "YES" ON THIS
BALLOT QUESTION, YOU ARE
VOTING FOR A PROPERTY TAX
INCREASE.

Passage of School District Question 1 extends an existing operating referendum at the same amount per pupil as in the previous year. Passage of School District Question 2 is contingent on the passage of School District Question 1 and will result in an increase in your property taxes.

The annual dollar increases for typical residential homesteads, apartments, commercial-industrial properties, and most other classes of property within the school district are as shown in the table below.

Win-E-Mac 2014 Homecoming Royalty Kara Stontelie, stepping in for Maggie Spry and Austin Tadman were on hand at this year's Homecoming Coronation to hand their crowns over to the new King and Queen.

Win-E-Mac 2015 Homecoming Junior Attendants were Alayna Espeseth and Nick Olson.

Win-E-Mac 2015 Homecoming Sophomore Attendants were Tyra Wilson and Connor Drewry.

Win-E-Mac 2015 Homecoming Freshmen Attendants were Savannah Stennes and Joseph Revier
